Education

Vardhaman college of engineering

Sep. 2024 - May-2028

Bachelor of Technology in Computer Science and Engineering

Hyderabad, Telangana

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Software Engineering
- Web Technologies
- Database Management
- Operating Systems
- OOPS

Projects

E-Waste Management Platform | *React.js, Node.js, Express.js, MongoDB*

2026

- Developed a full-stack web platform that connects citizens, repair technicians, recyclers, NGOs, and administrators to streamline e-waste collection and recycling.
- Implemented secure authentication, e-waste reporting, pickup scheduling, and role-based dashboards to support different stakeholders within the platform.
- Built RESTful APIs using Express.js and integrated MongoDB to manage user profiles, pickup requests, recycling records, and application data efficiently.
- Designed a responsive React.js interface with real-time status updates, intuitive navigation, and seamless interaction across desktop and mobile devices.

LearnPath AI - Personalized Learning Platform | *Python, Flask, SQLite, HTML, CSS, Jinja2*

2026

- Developed a personalized learning platform that analyzes student performance and delivers AI-driven learning recommendations to improve academic outcomes.
- Implemented secure authentication, automated timetable generation, and progress tracking using Flask and SQLite for efficient data management.
- Designed responsive user interfaces and an admin dashboard with HTML, CSS, and Jinja2 to enhance usability and platform management.

Entropy – Interactive Problem Solving Platform | *React.js, HTML, CSS, JavaScript, Tailwind CSS*

2026

- Developed an interactive web platform that enhances logical thinking and problem-solving through structured coding and aptitude challenges.
- Built responsive and reusable UI components using React.js and Tailwind CSS, improving usability and user engagement across devices.
- Designed an intuitive interface with seamless navigation to deliver an engaging learning and practice experience.

Technical Skills

Languages: Java, Python, C++, C, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Flask

Databases: MongoDB, MySQL, SQLite

Developer Tools: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, DBMS, Operating Systems

Achievements & Hackathons

- Secured **1st Place** in the **KG Reddy College Hackathon** for developing an **E-Waste Management Platform**.
- Built a collaborative project management platform during the **24-hour SNIST XTRM Hackathon** to balance team workloads, track task progress, and reduce stress and burnout during hackathon development.
- Developed a startup support platform during the **36-hour CodeNYX Hackathon** at **CVR College of Engineering** to help aspiring entrepreneurs validate ideas, access guidance from experienced mentors, and plan their business journey.

Coding Profiles

LeetCode: saivishal7 | **246+ Problems Solved** | **Contest Rating: 1404**

Codolio: ICPC2628019 | **419+ Problems Solved Across Platforms**

Research Publication

- Published the research paper "**Instant Stain Removal: A Portable Bio-Oxidative Fabric Cleaning System**" at **ICAMAS 2026**.
